

Android Solution Of AdMob Not Showing In WebView

While developing android application with **AdMob** and **WebView**, you can face with a big problem. This problem is that **AdMob** may **not** be **seen** in the screen because **WebView** encapsulates **all** screen. To overcome this **problem**, you should use a layout which looks like the following layout:

```
1 <?xml version="1.0" encoding="utf-8"?>
2 <RelativeLayout
3     xmlns:android="http://schemas.android.com/apk/res/android"
4     xmlns:ads="http://schemas.android.com/apk/res-auto"
5     android:orientation="vertical"
6     android:layout_width="fill_parent"
7     android:layout_height="fill_parent">
8
9     <LinearLayout android:id="@+id/linearLayoutWebView"
10        android:layout_height="match_parent"
11        android:layout_width="wrap_content"
12        android:orientation="vertical">
13         <WebView xmlns:android="http://schemas.android.com/apk/res/android"
14            android:layout_width="fill_parent"
15            android:layout_height="fill_parent"
16            android:fitsSystemWindows="true"
17            android:id="@+id/webMain"
18        />
19     </LinearLayout>
20     <LinearLayout android:layout_width="fill_parent"
21        android:id="@+id/ad_layout" android:layout_height="wrap_content"
22        android:gravity="bottom" android:layout_alignParentBottom="true"
23        android:layout_alignBottom="@+id/linearLayoutWebView">
24         <com.google.android.gms.ads.AdView
25            android:id="@+id/ad"
26            android:layout_width="fill_parent"
27            android:layout_height="wrap_content"
28            ads:adSize="BANNER"
29            ads:adUnitId="ca-app-pub-6976467397777777/4770767543"/>
30     </LinearLayout>
31 </RelativeLayout>
```
