

# "Data source name not found and no default driver specified" error on connecting using ODBC applications in PHP

If you get "Data source name not found and no default driver specified" error on connecting using ODBC applications exception check connection string same as follows:

```
1     $connStr =  
2     'odbc:Driver={Microsoft Access Driver (*.mdb)};' .  
3     'DBQ=C:\xampp\htdocs\efarmasi\Ayahya.mdb;Uid=; Pwd=';
```
