

Enable Sql Log in Laravel

Add following codes to routes.php file

```
1 Event::listen('Illuminate\Database\Events\QueryExecuted', function ($query) {
2     if (App::environment() == 'local') {
3         Log::info($query->sql . ' Parameters: ' . serialize($query->bindings));
4     }
5 });
```
