

Onesignal Rest API Push Notification in Wordpress PHP

We can use following wordpress codes to send notification in OneSignal:

```
1  $body = new stdClass();
2  $body->app_id = "31ee45e2-c63d-4048-903a-89ca43f3afa4";
3  $body->contents = array('en' => 'merhaba');
4  $body->filters = array(array('field' => 'tag', 'key' => 'authorID', 'relation' => '=', 'value'
5  => '54'));
6  $bodyAsJson=json_encode($body);
7
8  $response=wp_remote_post("https://onesignal.com/api/v1/notifications", array(
9      'method' => 'POST',
10     'timeout' => 45,
11     'redirection' => 5,
12     'httpversion' => '1.0',
13     'blocking' => true,
14     'headers' => array("Content-type" => "application/json;charset=UTF-8",
15         "Authorization" => "Basic YzUzNmZkOTAtMmVlMC00OWIzLThlNGQtMzQyYzIyNmFhZjcw"),
16     'body' =>$bodyAsJson,
17 )
18 );
echo $response["body"];//{"id":"2565d412-169f-4b7a-83ac-1e2e16d7e61d","recipients":1}
```
