

# A Design Trick For Mobile Web Application

If you design mobile web application, your layout should look like as follows:

## Css:

```
1 /*you can use other html elements that needs word-wrap*/
2 h1,h2,h3,h4,p,span,label{
3     word-wrap: break-word;
4 }
5 .page {
6     height: 100%;
7     padding: 10px;
8 }
9 .topic {
10    text-align: justify;
11 }
```

## Html:

```
1 <div class="page">
2   <div class="topic">
3     <!--other html elements-->
4   </div>
5 </div>
```
